

CareerUp

Sprint Cycle 1- User Interface

Nafee Ahmed • Isaiah Alfred • Jordan Monts • Malcolm Richards

Our Logo Over The Years(Weeks)

From Zero

To Hero

To A Great Logo

Our logo was initially hand-drawn by one of our group members. After realizing we weren't exactly great artists, we explored a few different renditions using AI while keeping our original concept as the foundation. After several iterations, we finally settled on our current design.

Describing Our UI Approach

We wanted to make our application feel familiar to the people who would be using it, so we took inspiration from popular platforms like TikTok and Instagram. We also incorporated darker tones and themes to give the application a more modern feel while adding to that sense of familiarity.

For students, the application is designed around a more mobile-friendly, vertical experience. We considered using this layout for every user, but we recognized that the professional users (recruiters, company representatives, career advisors, and administrators) would most likely access the platform from a desktop. The larger screen gives those users more space to view additional information and features that students don't have access to.

In our student use cases it would be more of a mobile friendly/vertical style. We considered making all roles like this, but took into account that the professional users of the app would most likely be on desktop and the bigger screen would be suited better for all the extra information students don't see and have access to.

The main focus of our UI is familiarity. We want users to feel like they already know how to use the platform, almost like a "brain trick." Think about how you can sometimes be scrolling through Instagram Reels and momentarily forget that you're not on TikTok. We want to create that same feeling, but instead of casual content, users are discovering educational content and career opportunities.

Team Meetings & Sprint 1 Completion

Meeting 1:

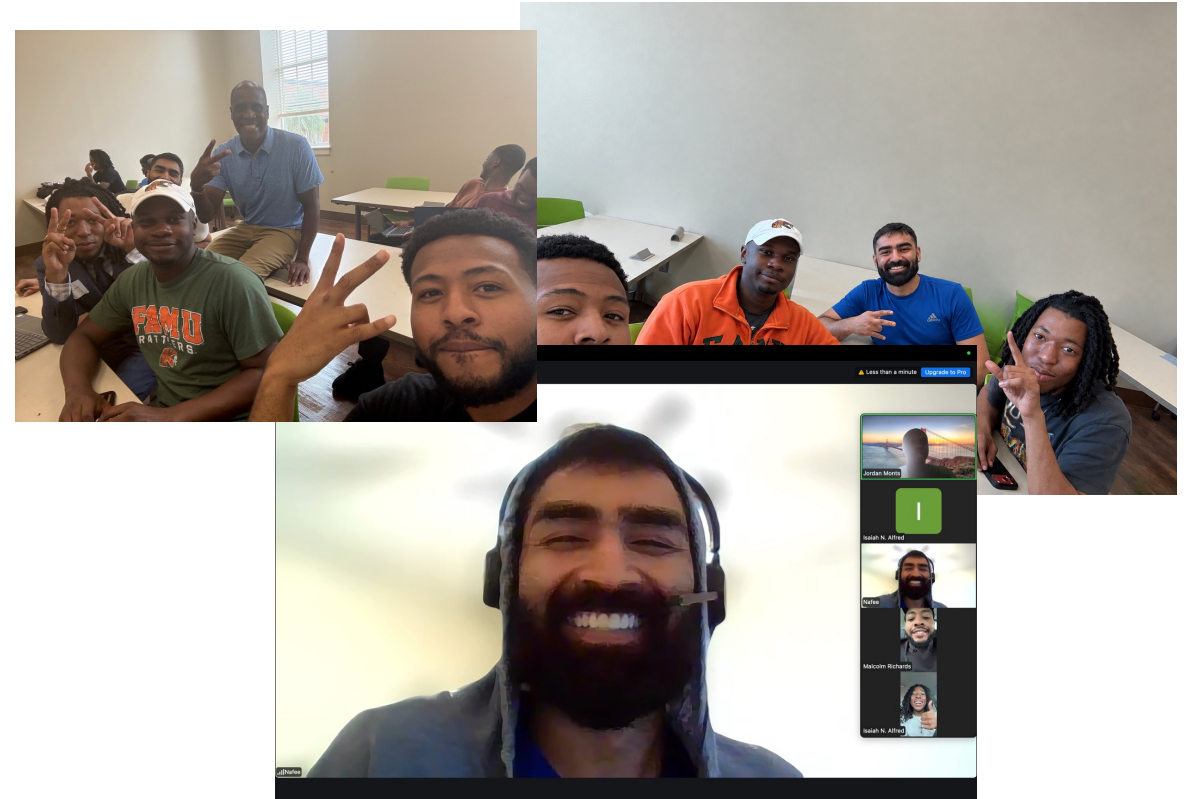

The team appointed the Scrum Master and finalized the logo evolution, brand color tokens, and company tagline *"From Resumes to Reels."*

Meeting 2:

We defined all five system roles, selected two distinct use cases per role, and assigned the splash screen technical implementation.

Meeting 3(Held virtually online due to conflicting travel schedules):

We confirmed every team member pushed commits to GitHub, verified local execution of the splash screen, and ran through the live presentation.
